* Applicants can choose more than one zone. "First choice fall applicants" represents only the first choice selection of each applicant, this number does not represent every option of all applicants.

^A First permits-A first permit is issued by evaluating every option of zones the applicant would accept in the order in which they made selections.

^B Second permits-All options of all applicants are evaluated to issue one permit to as many applicants as possible before any second permits are issued. All permits in 2005, including second permits, were issued through one lottery drawing. In 2006, second permits will not be issued through the lottery drawing. Remaining permits will be issued over-the-counter on a first-come, first-served basis.

The above numbers are PRELIMINARY. Permit levels may be revised following reviews of new population data.

Permit levels are set to allow the maximum recreational opportunities without impacting the turkey population while minimizing hunter interference problems. Permit levels reflect the amount of turkey habitat and turkey population densities and distribution in each zone. Fall turkey hunting is an additional opportunity. The number of permits for fall hunting will be lower than the number for spring hunting.
